Forecast for Wednesday 09 Aug 2023

Weather: Dry with clear spells overnight, perhaps with an isolated valley fog patch. A fine start with bright or sunny spells, then increasing amounts of high cloud during the morning making the sunshine hazy. Cloud increasing through the afternoon, perhaps with the chance of the odd spot of light rain or drizzle later.

Chance of cloud-free hill tops above 600m: Predominantly 90% or more.

Low cloud and visibility: Largely clear skies during the early hours. Just a small chance that areas of lower cloud developing later in the afternoon into the evening, may lower onto the highest summits. Visibility generally good or very good, although a small chance of poor later in any low cloud across the highest summits.

Forecast for Thursday 10 Aug 2023

Weather: Generally dry overnight with variable cloud amounts. Any patchy low cloud across the summits will quickly clear in the morning to give a dry day with bright or sunny spells and feeling much warmer. Thicker cloud and outbreaks of rain may reach the park from the west around midnight, perhaps with the odd heavier burst.

Maximum wind: Southerly 10mph gust 15-20mph

Chance of cloud-free hill tops above 600m: 40% at first, otherwise 90% or more.

Low cloud and visibility: Areas of cloud should be comfortably above summits for much of the day, after overnight areas of low cloud clear quickly after sunrise. Thicker cloud could again lower onto the highest summits around midnight. Visibilities generally good or very good outside of these areas of low cloud.

Temperature: **Valleys:** Plus 16 degrees Celsius rising to Plus 26 degrees Celsius.
At 600m: Plus 13 degrees Celsius rising to Plus 20 degrees Celsius.
Freezing level: Above summits.
